

## **CSSS.NET Receives Direct Award at the Internal Revenue Service**

In December 2008, CSSS.NET, a leading Information Technology firm, received a direct award to provide information security services to the U.S. Department of The Treasury Internal Revenue Service (IRS). Under this contract, CSSS.NET provides support in a variety of information technology security areas to include policy support, risk management, identity and access management (IAM), and Federal Information Security Management Act (FISMA) implementation. According to CSSS.NET President/CEO, Lisa Wolford, "This award is of significant importance to our company and we are committed to providing high quality services and working closely with the IRS to help them achieve security compliance at all levels".

CSSS.NET is a service-disabled veteran-owned, 8(a)/SDB-certified, woman owned small business specializing in providing information technology services and engineering support to the Federal government. Our services include enterprise architecture, systems and software engineering and integration, information assurance, cyber security, network operations, and geo-spatial information services.
